PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, component-based web interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3. Skilled in integrating REST APIs, managing application state, and delivering cross-browser, mobile-responsive UIs. Comfortable across the modern frontend toolchain, including Tailwind CSS, Redux Toolkit, and Git. BCA graduate (9.17 CGPA) with three independently built and deployed projects, seeking a frontend or full-stack engineering role where I can contribute to scalable, user-focused products.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, SQL

Frameworks & Libraries: React.js, React Hooks, Redux Toolkit, Tailwind CSS, Bootstrap, jQuery, Axios, Chart.js

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

Core Concepts: Responsive Design, REST API Integration, Component-Based Architecture, DOM Manipulation, Cross-Browser Compatibility

PROJECTS

Ask AI — AI Chat Application

[Live Demo: ask-ai-saloni.surge.sh](https://ask-ai-saloni.surge.sh)

React.js, JavaScript (ES6+), Tailwind CSS, Gemini API, Local Storage

- Built a ChatGPT-inspired AI chat application powered by the Gemini API, generating real-time conversational responses.
- Implemented dark/light mode theming, recent search history, and chat history management with persistent storage via the browser's Local Storage API.
- Integrated syntax-highlighted code blocks, auto-scroll, and Enter-to-Send functionality; designed a fully responsive UI for desktop and mobile.

TaskFlow — To-Do Web App

[Live Demo: bespoke-pika-271518.netlify.app](https://bespoke-pika-271518.netlify.app)

HTML, CSS, JavaScript

- Developed a responsive to-do application supporting task creation, deletion, and completion tracking.
- Engineered persistent task storage using the localStorage API, retaining user data across sessions without a backend.
- Built a fully responsive interface from scratch using semantic HTML5 and CSS3.

Facial Recognition Attendance System

Python, OpenCV, Tkinter, SQLite

- Built a desktop attendance system performing real-time facial recognition with OpenCV.
- Implemented a face-registration workflow backed by a local SQLite database.
- Automated attendance logging by generating CSV export files for each session.

EDUCATION

Master of Computer Applications (MCA) — In Progress

Indira Gandhi National Open University, New Delhi

2025 – 2027

Bachelor of Computer Applications (BCA)

Gautam Buddha University, Greater Noida — CGPA: 9.17/10

2022 – 2025

KEY STRENGTHS

UI/UX Thinking • Responsive Design • Debugging • Communication • Time Management
